

## Chemical Instrumentation and Automation (Chemical Engineering and Technology Professional higher education applies to version 5 common Eleventh Five national planning materials)

Filesize: 8.49 MB

### ***Reviews***

*The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).*

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 262 Publisher: Chemical Industry Pub. Date :2011-07-01 5th Edition. Li Yuming editor of the chemical instrumentation and automation. is to maintain the basic architecture of the fourth edition. based on its contents in addition to old Tim new. appropriate changes made. This book is divided into 10 chapters. In addition to introduction of industrial production process control system. the basic knowledge. but also introduced the automatic control system constitutes a controlled object. detection devices and sensors. automation instruments and actuators. In the simple. complex control systems. based on the introduction of the new control systems. computer control system. and finally with the production process describes the typical chemical unit operation control program. Chemical Instrumentation and Automation for Chemical Engineering and Technology professionals. also applies to other types (such as oil. medicine. light industry. food. forestry. metallurgy. coal. biology. environment. .) relevant professional colleges and universities. but also Available in continuous production process technology officers. Contents: Introduction The first chapter the basic concepts of automatic control system the main contents of Section II automated chemical control system and the basic components that form an automatic control system composed of two basic automatic control system that automatically controls the form of Section IV classification system. automatic control system of the transition process and quality indicators of a control system of static and dynamic two. the control system of the transition process three or four indicators of the quality control system. affect the quality control system. a major factor in the transition process and exercises The second chapter features questions thinking process and its mathematical model and its first section describes the chemical characteristics of the process method of Section...
