Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Because of the complexity and importance of the U.S. transportation system, government at all levels; Federal, State, and local has assumed a wide range of roles and responsibilities in transportation. At the Federal level, these responsibilities include: promoting the development of an efficient and accessible national transportation system; promoting fair competition and protecting the public from abuse of monopoly power; protecting the safety of travelers and cargo; and balancing environmental, social, and energy goals with transportation needs. Current transportation issues involve: rail freight transportation, rail passenger service, urban mass transit, highway and auto safety, trucking industry regulation, air transportation, inland waterways, ocean transportation, and pipelines. Future developments in three areas; energy, environmental quality, and new technology are likely to have particular importance for the U.S. transportation system. GAO has been involved in: developing and coordinating balanced national transportation policies and programs; evaluating efforts at restructuring and rehabilitating the railroad freight transportation system; evaluating programs to develop a safe motor vehicle, highway transportation system; evaluating the management of Federal assistance programs for highway construction and maintenance; and evaluating the justifications for transportation regulation. Other GAO activities have included audits of Amtrak s management role and studies of aircraft safety and economic regulation. The GAO role in developing economically viable urban public transit systems has been limited.
